Election/Restriction

1. Claims 1-8 are pending.
2. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-4 drawn respectively to a method of diagnosing disorders or Alzheimer's disease, classified for example in class 435, subclass 5.
 - II. Claim 5-6 drawn to a method of diagnosing dementia and prion disease via measurment of acetylcholinesterase bound to Con A, classified for example in class 435, subclass 6.
 - III. Claims 7-8 drawn to a method of diagnosing dementia and prion disease via measurment of butyrlcholinesterase bound to Con A, classified for example in class 435, subclass 7.1.
3. The inventions are distinct, each from the other because of the following reasons:
4. Inventions I-III are related as processes. The processes are distinct each from the other as the processes differ in reagents, steps, functions and effects. In particular the methods diagnose different diseases, comprise different samples, and differ in the presence or absence of assessment of acetylcholinesterase or butyrlcholinesterase assessment in association with ConA. These steps are different assays of different peptide products and samples, requiring different search of the prior art and consideration by the Examiner.
5. The inventions are distinct, each from the other because of the following reasons:
6. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction

for examination purposes as indicated is proper.

7. Because these inventions are distinct for the reasons given above and the search required for any Group is not required for any other Group, restriction for examination purposes as indicated is proper.

8. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

9. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

10. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

11. Any inquiry of a general nature or relating to the status of this general application should be directed to the Group receptionist whose telephone number is (703) 308-0196.

Papers relating to this application may be submitted to Technology Center 1600, Group 1640 by facsimile transmission.
